

Algorithm-Driven Culture

How TikTok and RED reshape global social media

PRESENTED BY Du Yu · Han Yiran · Liu Ruoshui · Lin Xiangwen · Zhang Wenjing

• PLATFORMS

• AI

• GLOBALIZATION

Roadmap

Four steps to decode Algorithm-Driven Culture.

01

Digital Gravity

Why users enter the orbit

02

Algorithmic Twins

TikTok versus RED

03

Three Tech Keys

Recommend · Create · Convert

04

Ethics & Future

What kind of planet?

One thread: technology becomes culture.

A new digital gravity field

Why can these apps attract young users worldwide without relying only on traditional global promotion?

01

Global attention

Young users discover trends through feeds.

02

Local adaptation

Apps translate global trends into local habits.

03

Hidden engine

Algorithms connect users, creators, and products.

Globalization × Glocalization × Digital Gravity

Same gravity. Different pull.

TikTok
DISCOVERY FIRST

CORE ENGINE	Interest Graph
KEY ACTION	Swipe
AI ROLE	A prophet of hidden interests
COMMERCE	Interest-based e-commerce

VS

RED
INTENT FIRST

CORE ENGINE	Social Graph + Intent Graph
KEY ACTION	Search
AI ROLE	An external brain for lifestyle decisions
COMMERCE	Buyer-driven e-commerce

Algorithm-Driven Culture starts with different signals.

The engine learns from **every signal**

TikTok REAL-TIME LOOP

RED INTENT LOOP

KEY MESSAGE

Different algorithms create different cultures.

AI makes everyone a creator

Creation tools lower the barrier between an idea and a shareable format.

04

AIGC

05

Virtual
Avatars

06

Augmented Reality × AIGC × Democratized Creation

From attention to **purchase**

TikTok

01 / ENCOUNTER

**Algorithmic
match**

02 / MOMENTUM

→ **“TikTok made
me buy it”**

03 / CONVERSION

→ **Interest-based
purchase**

RED

01 / QUESTION

**Search for
advice**

02 / TRUST

→ **Reviews
+ KOCs**

03 / DECISION

→ **Buyer-driven
purchase**

Content becomes infrastructure.

IN-APP PAYMENT

SOCIAL COMMERCE

The shadow of algorithms

Relevance has a cost. The same gravity that attracts can also narrow our view.

The question is not only whether algorithms are powerful, but whether they are responsible.

Global platforms need cultural awareness, transparency, and user agency.

What kind of digital planet are we creating?

“The gravity of this change is increasingly coming from the East.”

- 01 Social media is entering an AIGC-native era.
- 02 Platforms create digital tribes through shared interests.
- 03 Technology is reshaping global culture, not only communication.
